

Transaction Record Wording – TR – 2017-02

Task Team Chair Name (First and Last)

Louis Panzer

Date Submitted

Mon, 05/07/2018

Transaction Record (TR) Number

TR-2017-02 Electronically Locatable Lines

Proposed Practice Statement or Modification

When designing and installing new facilities, a means is provided to allow the facilities to be electronically locatable.

Proposed Practice Description or Modification

Many facilities are damaged due to the fact of they cannot be located electronically. Non-conductive materials, such as PVC, cannot be located using traditional locate methods. When designing and installing non-conductive facilities, the use of a tracer wire or other method is part of that design and installation. This will allow these facilities to be identified, located and marked prior to future excavation activities.

Proposed References

NC State Statute Article 8A 87-121 (g)

Is this a modification to an existing practice?

No

Is this a proposed new practice?

Yes

Was this wording agreed to by consensus of all task team members?

Yes

If yes, are you submitting for approval consideration by the Best Practices Committee at the next meeting?

Yes

Additional comments/notes for committee consideration
